

Installing your PocketSuite Scheduling Widget onto your Facebook Business Page

1) Go to your Facebook Business page, tap the new **Create Call to Action** button on your banner photo.

2) Choose **Book Now** as the button option, and simply paste in your widget URL link (see below on how to access your widget URL).

NOTE: Your widget URL (along with your **User ID**) is included in the directions email that you can send to yourself by going to PocketSuite under Settings -> Online bookings. Your widget URL will look like the below:

[https://book.pocketsuite.io/book/\[USER ID\]](https://book.pocketsuite.io/book/[USER ID])

3) Tap "SAVE" and you're all set!

Now when any Facebook visitor taps **BOOK NOW** on your page (via desktop or mobile), they can browse your services, your availability, and submit real time booking requests day or night 😊
